I joined Tuckers in 2015 to work with the Practice Director in all aspects of the business ensuring Tuckers deliver high quality services to staff internally. I have a focus on, and oversight of our central services, combined with experience of working with each of our offices nationally. I'm always looking to learn and apply best practice for the firm as a whole. Prior to joining Tuckers I worked for the Crown Prosecution Service for over 10 years with the last role at national level with involvement in many cross agency developments and delivery. I'm able to bring a rounded perspective having worked as a Paralegal, Business Manager, Case Progression Manager and in the National Development and Delivery team. During that time I also acquired a project management qualification in PRINCE 2 and studied mathematics and computing at the Open University. I aim to guide our staff to 'work smarter' and give the maximum benefit through technology and improving relationships with external agencies. I'm always looking for ways to integrate with external systems keeping us efficient and ahead of developments so I'm able to provide training, expertise and support to all our staff.
